

Swimming Pool Installation Engineer

Do you want to be part of a highly motivated, professional swimming pool company? Do you have a minimum of 3 years experience installing swimming pools and spas? If the answer is yes to both questions and you are looking for a new challenge then read on. Due to constant growth of the company an opportunity will be available to the successful candidate to join our experienced team as a Swimming Pool Installation Engineer.

All candidates need to be forward thinking. Always be thinking 1-2 weeks ahead on what materials you may require throughout the job to keep yourself and others on program. Our work is a good mixture of commercial and domestic projects. We have minimum working away time as most of our projects are within traveling distance.

As a growing company you will get opportunities to develop into other roles within the company if you so desire. Every 12 months in December we aim to give out yearly bonuses and pay rises to all staff (This is dependant on performance).

Weekend overtime is always available. You will given a company vehicle and fuel card.
